

Model 0700

Fusion-Welded Single-Hung Vinyl Windows

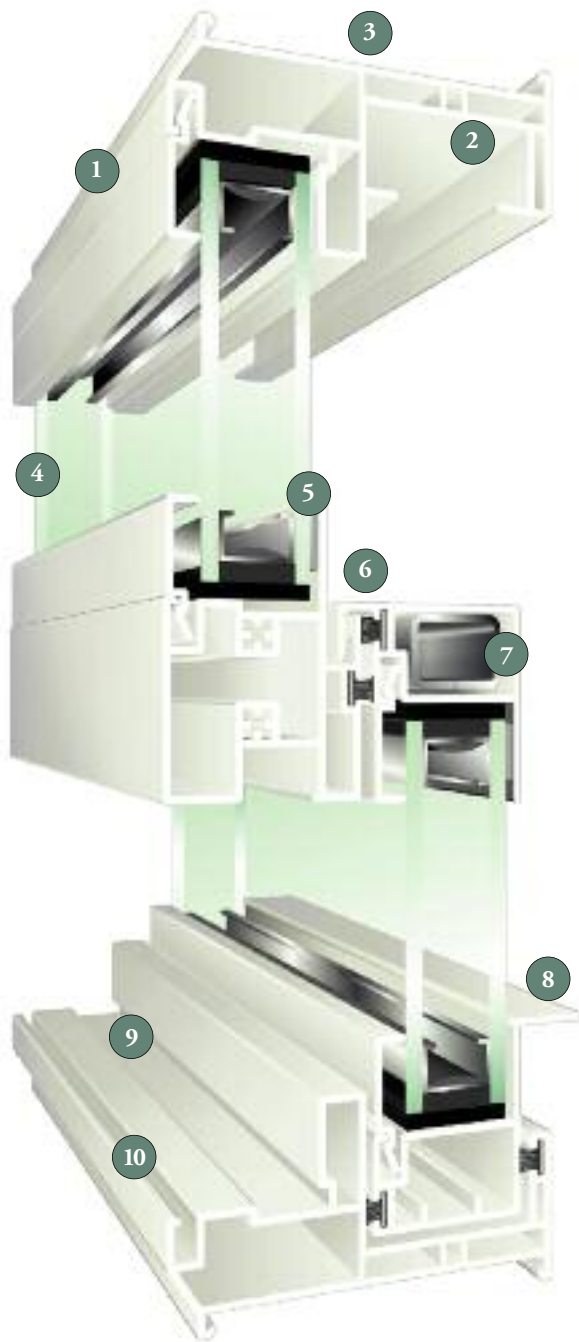

*Your best solution for residential
and light commercial applications.*

Alside[®]

Model 0700 Single-Hung Window

The Model 0700 Single-Hung, fusion-welded vinyl window offers a great solution for not only contemporary or traditional architecture, but also for residential, multi-family or light commercial installations. The sleek lines of this window, surrounded by an appealing beveled mainframe make the Model 0700 a wise choice for beauty, maintenance-freedom and energy efficiency.

1. **Beveled exterior mainframe** for added beauty and a clean appearance.
2. **Multi-chambered sash and mainframe** create insulating air spaces for superior thermal efficiency.
3. **Mainframe jamb depth dimension of 2-3/4"** allows for replacement installations.
4. **Insulated glass unit with optimal air space** improves year-round performance.
5. **PPG Intercept® Warm-Edge Spacer System** maximizes performance and longevity.
6. **Interlock at sash locking rail** adds to your sense of security, comfort and well-being.
7. **Metal reinforcement** for added strength at the locking rail.
8. **Fully extruded lift rail** provides strength and stability for easy operation.
9. **Full-capture sill** enhances protection from water and air infiltration.
10. **Vinyl frame and sashes** will never chip, peel, crack or warp. Made with premium raw materials, the vinyl color is formulated throughout so the beautiful luster lasts.

Plus these additional features:

- Fusion-welded mainframe and sashes add strength and rigidity.
- Constant force balance system eliminates sash cords, weights and pulleys. You'll benefit from smooth, comfortable fingertip operation.
- Full balance covers help protect against air infiltration while adding a finished look to the window frame.
- Tilt-in bottom sash makes cleaning safe and easy from inside the home.
- Double barrier-fin weatherstripping at sash sides helps keep out dirt and noise, and protects against air infiltration.
- Fiberglass half screen provides ventilation while keeping insects out.

Enhance your windows with these options:

- ClimaTech® insulated glass package featuring Low-E glass, argon gas and the Intercept Warm-Edge Spacer System for enhanced insulating performance.
- 5/8" exterior face/stucco flange frame extender.
- Standard, contoured or brass grids are placed between the panes for easy cleaning.

Model 07HP

- High performance option of standard Model 0700 for high wind areas where increased design pressure ratings for windows and/or mull system may be required.
- "C" class mull is steel reinforced and attaches at head and sill of the opening with "L" brackets for additional strength.
